Profile

I am a dynamic and strategic Product Designer with 6+ years of experience specializing in UI/UX design and end-to-end product development. Currently driving innovative digital products at Qwipo, a product-based company, with a strong focus on building scalable workflows and seamless user experiences.

Experienced in collaborating with stakeholders to gather requirements, creating user stories, and translating PRDs and API documentation into intuitive, high-impact frontend designs. I take ownership of products from concept to execution, applying system thinking, usability principles, and rapid prototyping approaches to deliver efficient and user-centric solutions.

Passionate about mastering UI/UX, CX design, and design psychology while expanding expertise in AI-driven design, product strategy, and design-to-code workflows, with a long-term vision of moving into leadership and building impactful digital products.

Experience

DEC 2025 – Present

Hybrid (C2H)

Senior Product designer
Qwipo

DEC 2023 – OCT 2025

Hyderabad

Senior Product designer
Achala IT Solutions

AUG 2021 – NOV 2023

Hyderabad

UI/UX & Brand designer
Flytta Innovations Pvt Ltd

JUN 2020 – AUG 2021

Hyderabad

2D Animator – Intern
Cosmos Maya

- Handled end-to-end product design, stakeholder collaboration, and building scalable workflows from PRDs and APIs.
- Own and deliver complex systems, translating business requirements into intuitive, high-impact user experiences.
- Handle design systems, user flows, and rapid prototyping, with a focus on usability, efficiency, and product scalability.
- Worked on complex B2B/B2C logistics and seller applications, optimizing flows such as onboarding, order management, inventory, and pricing systems.

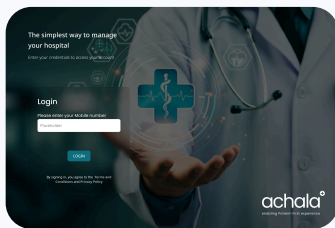

- Over 2+ years at Achala IT Solutions Pvt. Ltd., I have specialized in designing and delivering 40+ high-impact healthcare and enterprise applications.
- Proven expertise in solving real-time operational and medical challenges for leading hospitals such as AIG, Continental, Arete, KIMS, Kamineni, Nephroplus, and Aster Hospitals.
- I led projects from concept to execution – conducting stakeholder research, defining UX architecture, building scalable design systems, and delivering user-friendly interfaces aligned with ABHA, WCAQ, and healthcare guidelines.

- Directed brand design and visual strategy across multiple digital platforms.
- Oversaw UI/UX implementation in mobile applications, ensuring design consistency and user engagement.
- Mentored junior designers and established design guidelines to streamline processes.

- Created dynamic social media content including both static and animated visuals to enhance online engagement.
- Developed comprehensive brand identities and logos for multiple projects, ensuring consistency and strong visual appeal.
- Contributed to environmental branding, creating immersive and cohesive design experiences within physical spaces.

- Utilized Flash Animator and Adobe Animate to create engaging 2D animations, honing technical skills in the process.
- Contributed to multiple episodes of a Cartoon Network animated series, gaining hands-on experience in a professional production environment.
- Developed a strong foundation in 2D animation principles, including timing, spacing, and character movement.
